## DETAILED ACTION

### *Claim Objections*

1. Claim 31 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 31 recites that the composition is further comprised of natural sweeteners, however claim 27 is already comprised of natural sweeteners, therefore claim 31 fails to further limit claim 27.

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 27-36 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,2,3,6,7,9,10,13,14,15 and 18 of U.S. Patent No. 6,716,471. Although the conflicting claims are not identical, they are not patentably distinct from each other. The peanut powder compositions claimed in Patent 6,716,471 encompasses the scope of the instantly claimed composition. In addition, Patent 6,716,471 claims the use of amino acids, herbs and vanilla flavoring in the peanut powder composition, which would respectively encompass the proteins, caffeine and flavoring as instantly claimed. Patent 6,716,471 also claims the use of the peanut powder composition in claims 9-10, these claims encompassing instant

claims 33-36. Patent 6,716,471 claims the use of natural sweeteners in the recitation of sugar in the peanut powder composition.
